

## **FUEL – Galvanising the Industry’s Young**

**October 2004**

FUEL ‘Your Transport Career held yet another highly successful networking night, on Thursday, 21 October.

A swish new venue, the Leveson Hotel, and another encouraging turnout of over 70 underscores the extent to which a new committee has injected a fresh and vigorous energy into the FUEL initiative.

Guest speaker and Richmond AFL legend Kevin Bartlett addressed entertained attendees with numerous vignettes of his days in the game, both as player and coach.

Kevin’s colourful address yielded some valuable, motivational and highly instructive advice and inspiration for young people embarking on their professional careers and reaching for personal best.

FUEL Committee Chairperson Angela Murphy, of E. Murphy and Sons, called on guests to become more involved in making the valuable connections that are essential in any industry.

Introducing her fellow Committee members, Angela encouraged attendees to, “Get to know your committee, give us your feedback, tell us what it is you think you want out of FUEL and work with us to make this an invaluable networking hub and a vital tool for young people in the transport industry.”

Aimed at young members of the Freight and Logistics industry, FUEL seeks to bring together employees and employers, suppliers, operators, and contractors in a relaxed informal environment and to foster interaction and networking amongst the future generation of the Freight Industry.

The FUEL Christmas Cocktail Function was held on Friday, 3 December at the Leveson Hotel and featured a live five piece band, lots of fabulous finger food, dancing, merriment – and of course, networking aplenty. A full report will appear in the next edition of Priority Report.
