VTA Welcomes Step Towards North East Link's Construction

The Victorian Transport Association (VTA) has welcomed the State Government's recommitment to the North East Link.

"Today's news means Victoria is now one step closer to getting the North East Link built," said VTA CEO Peter Anderson.

"This much-needed infrastructure project will ease congestion, improve safety and community amenity, boost economic productivity and will provide a safer, cleaner environment for those living in the North East of Melbourne.

"The VTA looks forward to continuing to contribute further to this vital project over the months to come," Mr Anderson said.
